

# Automatsko otvaranje i pregled priloga na primljenom računu

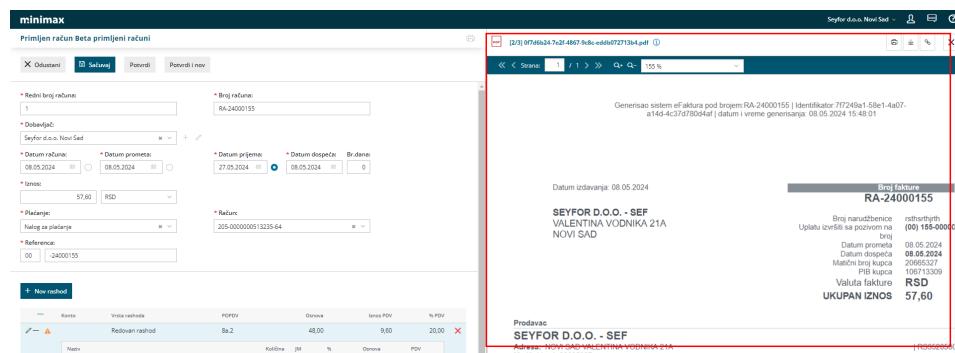

Poslednja izmena 23/06/2025 2:59 pm CEST

Novom verzijom programa kada priložite datoteku (e-fakturu, PDF, JPEG...), novom primljenom računu, automatski Vam se otvara prilog tako da nije potreban dodatni klik za otvaranje pdf-a.

Ako postoji više priloga, podrazumevano je da će se prvo otvoriti PDF, ako postoji, a ako ima više PDF-ova, otvara se prvi:

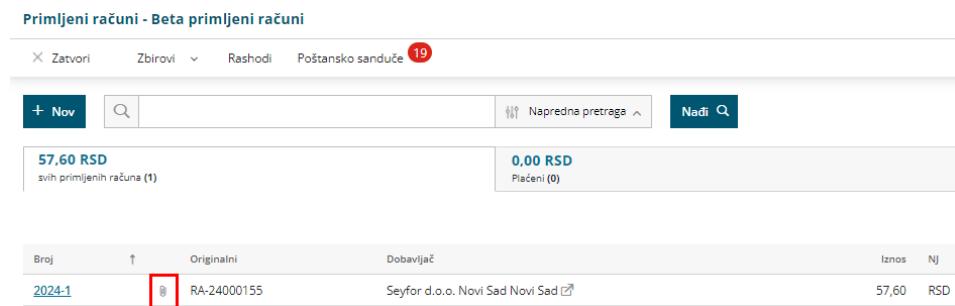

The screenshot shows a software interface with a toolbar at the top. In the center, there is a message box with the title "Proverite obaveštenja preko dnevnika Poštane pošte". Below the message box, there is a list of received invoices. A context menu is open over the second invoice in the list, with the option "Priložite novom primljenom računu" highlighted in red. Other options in the menu include "Priloži na postojeći primljeni račun", "Odobrenje/Prihvatanje", and "Odbijanje".

The screenshot shows the "minimax" software interface. On the left, there is a form for entering invoice details like number, date, and recipient. On the right, a viewer window displays an e-invoice document titled "RA-24000155". The document contains standard invoice information such as date, recipient, and total amount. A red box highlights the viewer window area.

Takođe na pregledu primljenih računa (Poslovanje > Primljeni računi) sada možemo videti koji računi imaju dodate priloge bez da ulazimo u njih. Pored broja računa nalazi se mala spajalica koja označava da na tom računu ima zakačen prilog:

The screenshot shows the "Primljeni računi - Beta primljeni računi" screen. It lists received invoices with their details. A red box highlights the small attachment icon (a document symbol) next to the first invoice entry, which corresponds to the one shown in the viewer window above.
